## EXPERIENCE

### Full Stack Web Developer (Contract)

Aug 2023 - Present

*Gleason Holdings Group LLC*

*New York, NY*

- Utilized React and Express.js along with a NoSQL, MongoDB database (MERN) to engineer reliable and performant e-commerce client/server packages.
- Deployed and managed staging/production environments utilizing the Git CLI for version control.
- Integrated with third party APIs such as Stripe, Apple Pay and Google Pay to securely process orders and provide flexible payment options to end-users, increasing business revenue and customer retention.
- Utilized the Javascript testing library, Jest to thoroughly test functionality of code in a test-driven approach while writing clean, documented code to ensure stability and reliability.
- Developed web designs translating mockups into responsive pixel-perfect design implementations using CSS Grid, Flexbox and media queries with a mobile-first design approach.

### Transportation Security Officer

Dec 2021 - May 2022

*U.S. Department of Homeland Security*

*New York, NY*

- Collaborated with fellow team members and law enforcement agencies, calmly and logically responding to security incidents while ensuring compliance with established protocols.
- Reviewed technical documentation to address common technical issues related to screening equipment promptly escalating complex issues when necessary.
- Provided professional assistance to passengers, effectively communicating security procedures and resolving any inquiries or concerns throughout the screening process.

### Research Associate In Security Management

Jun 2020 - Feb 2021

*John Jay College of Criminal Justice*

*New York, NY*

- Edited and reviewed university publications ensuring accuracy on infosec and risk management trends through independent research, consultations and interviews with industry professionals.
- Maintained large Excel data sheets and developed revision workflows using macros for efficient data organization.

## PROJECTS

### Where's My Package | *React, TypeScript, Node.js, Express.js, Heroku*

Mar 2023 - Present

- Integrated real-time data aggregation, unifying JSON data from separate official and community software package APIs based on user-defined search queries enhancing software discovery.
- Implemented modern responsive web design principles, strictly adhering to Arch Linux's branding and styling guidelines ensuring a consistent user experience.

### Pass Ninja | *React, TypeScript, Node.js, Express.js, Heroku, MongoDB*

Jul 2023 - Jan 2024

- Developed Pass Ninja, a password manager incorporating JWT tokens for session management, Bcrypt for password encryption, and uniquely generated QR codes to offer 2FA integration.
- Designed and crafted a user-friendly interface with a strong emphasis on teaching users about modern password security practices through a user friendly password generation tool and tooltips.

## EDUCATION

### John Jay College of Criminal Justice

Aug 2017 - May 2021

*Bachelor of Science in Security Management, Computer Science Minor, 3.51 GPA*

*New York, NY*

### The Odin Project (Coding Bootcamp)

May 2022 - May 2023

*Full Stack Development*

*Online*

- Completed The Odin Project's Full Stack Web Development curriculum, with 30+ independent projects, demonstrating proficiency in common web programming languages, dev tools and workflows.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Python, C++, HTML, CSS, TeX, Bash/Shell

**Libraries:** React, Express.js, Stripe, Mongoose, Framer Motion, Jest, Passport.js, Bcrypt

**Technologies:** Linux, Unix, Git, Node.js, Heroku, VMware, Firebase, Screaming Frog, Google Workspace

**Databases:** NoSQL, MongoDB, Firebase
