## EDUCATION

- John Jay College of Criminal Justice** Aug 2017 - May 2021  
*Bachelor of Science in Security Management, Computer Science Minor, 3.51 GPA* New York, NY
- Emerging Full Stack Developer, Coding Bootcamp** May 2022 - May 2023  
*The Odin Project* New York, NY (Remote)
- Completed The Odin Project's Full Stack Web Development curriculum, with 30+ independent projects, demonstrating proficiency in JavaScript, TypeScript, MongoDB, Express.js, React and Node.js.
  - Showcased proficiency in crafting accessible, responsive modern designs to create user-friendly experiences with support for both mobile and desktop platforms.

## EXPERIENCE

- Full Stack Web Developer (Contract)** Aug 2023 - Present  
*Gleason Holdings Group LLC* New York, NY
- Collaborated closely with stakeholders to design and develop an e-commerce in alignment with the brand's vision, emphasizing user experience and user retention.
  - Utilized React and Express.js along with a NoSQL, MongoDB database to engineer and maintain a reliable, secure and performative client/server package.
  - Managed network activities on a Ubuntu (Linux) server, reviewing server logs to swiftly address and troubleshoot user technical issues via email.
  - Utilized Screaming Frog for competitor analysis and SEO enhancements, while applying insights from Google Search Console for indexing and page performance recommendations.
- Transportation Security Officer** Dec 2021 - May 2022  
*U.S. Department of Homeland Security* New York, NY
- Operated advanced screening equipment with a commitment to learning and adapting to new technologies.
  - Addressed common technical issues related to screening equipment promptly escalating complex issues when necessary.
  - Applied a logical and analytical mindset to assess and respond to potential threats ensuring effective and informed decision-making.
- Research Associate in Security Management** Jun 2020 - Feb 2021  
*John Jay College of Criminal Justice* New York, NY
- Reviewed university publications ensuring accuracy and professional standards by proofreading and staying current on InfoSec and Risk Management trends via industry consultations and interviews.
  - Maintained large Excel data sheets and developed revision workflows using macros for efficient data organization.

## PROJECTS

- Where's My Package** | *React, TypeScript, Node.js, Express.js, Heroku* Mar 2023 - Present
- Integrated real-time data aggregation, unifying information from separate official and community software package APIs based on user-defined search queries.
  - Implemented modern responsive web design principles and strictly adhered to Arch Linux's official branding styling rules, ensuring a consistent user experience in alignment with the brand's standards.
- Pass Ninja** | *React, TypeScript, Node.js, Express.js, Heroku, MongoDB* Jul 2023 - Jan 2024
- Developed Pass Ninja, an innovative password manager incorporating JWT tokens for session management, bcrypt for password encryption, and uniquely generated QR codes to offer 2FA integration.
  - Designed and crafted an intuitive, user-friendly interface with a strong emphasis on educating users on modern password security practices.
